## **Modular Devices Acquisition, LLC Welcomes Chris Patterson as Vice President of Cleanrooms Division**

Indianapolis, IN - Modular Devices Acquisition, LLC (Modular Devices), a renowned provider of mobile cath labs and mobile cleanrooms, is proud to announce the appointment of Chris Patterson as the Vice President of the Cleanrooms division. Patterson joined the team on February 20th, 2023 and will be focused on the expansion of the Cleanrooms division into the Life Sciences market, ensuring the growth and development of the business.

Patterson brings extensive experience to his new role, with a background in facilities, engineering, operations, and project management. He has a proven track record of making sound business decisions based on data-driven performance and continuous improvement while taking full accountability for outcomes. Patterson is passionate about team development and has a unique ability to influence through his leadership and management style.

Before joining Modular Devices, Patterson worked as the Owner and Managing Director of Beacon Project Solutions, where he provided consultation and owner's representation for construction, capital expansion, and facility retrofit projects. He also worked as the Sr. Director of Engineering Operations at Rubius Therapeutics, where he was responsible for setting the strategy to operationalize a new manufacturing site, including a capital retrofit of an existing monoclonal antibody facility into a cGMP cellular therapy manufacturing facility.

At Modular Devices, Patterson will lead the Cleanrooms division, where he will focus on expanding into the Life Sciences market, building the cleanrooms business, and contributing to the overall success of Modular Devices. Patterson's experience in program management, capital project management, facility design review, and operational readiness planning will be invaluable to the company's growth and success.

Mark Koers, Chief Revenue Officer (CRO) said, "We're delighted to welcome such an experienced cleanrooms engineer as the new VP of Cleanrooms for Modular Devices. His years of experience in cleanroom engineering, design and validation, along with his work in the Life Sciences market and cGMP operations makes him ideally placed to contribute to the next phase of Modular Devices Mobile Cleanrooms growth."

Modular Devices Acquisition, LLC is excited to have Chris Patterson join the team and is looking forward to the growth and expansion of the Cleanrooms division under his leadership. For more information about Modular Devices, visit [portable-cleanroom.com](http://portable-cleanroom.com).
